COUNTY SPATIAL SOLUTIONS

COUNTY SPATIAL SOLUTIONS

Planning and Development are important issues that key decision makers in a County are faced with. These activities are spread across several vertical segments - Health, Economic development, Environment, Land information, etc. NeST GIS has competencies in all those areas required to deliver GIS solutions for the Counties - good domain knowledge, technical expertise on industry-standard GIS platforms, sound project management practices, experience in implementing enterprise-wide GIS encompassing the full Software Development Life Cycle (SDLC) processes and stringent adherence to quality processes.

LANDUSE

For Counties responsible for creating and adhering to a logical, coordinated land use pattern that provides for a variety of development, and recognizes land and infrastructure capabilities and limitations, our solutions include:

- * Landuse Mapping tools
- * Landuse planning tools
- * Powerful and Dynamic reporting tools

ECONOMIC DEVELOPMENT

For Counties aiming to retain and expand existing businesses, to attract new businesses that enhance the overall quality of life of county residents, our solution for Assisting Businesses include:

- * Landmark Locator
- * Transportation Locator
- * Business Locator
- * Demographic Report

TRANSPORTATION

For planning a safe and secure multi-modal transportation system that is efficient, interconnected and accessible, promoting a sustainable transportation solution that complements the county's natural and built environment. Our solution include:

- * Journey Planner
- * Place Planner
- * Mobile Alerts

HISTORICAL RESOURCES

Enabling Counties to manage and promote historical resources and the heritage, our solutions include:

- * Historical and cultural site pointers
- * Driving routes to Historical and cultural monuments
- * Distance information between Historical and cultural monuments
- * Viewing historical monument preservation programme and create pre-defined reports

AGRICULTURE

Enabling Counties to manage prime farmland, the agricultural economy and rural way of life, our solutions include:

- * Development Tracking
- * Infrastructure / Facilities tracking
- * Historical Pest attack Report
- * Land use maps
- * Location information

ENVIRONMENT & ECOLOGY

For Counties involved in protection and preservation of its natural features, environmental areas and ecologically sensitive habitats, our solutions include:

- * Sensitive Ecosystem Inventory
- * Forest Fire Mapping
- * Forest Inventory Mapping
- * Monitor incentive and assistance programs being executed by Private agencies

HOUSING

For Counties providing a wide range of affordable housing types throughout the county at appropriate densities based on identified growth areas, access to health and human resources, shopping, employment opportunities, utilities, transportation system, public transit, walkability etc, our solution include:

- * Application Tracking
- * Building Permit Tracking
- * Track Zoning, Zoning Variances, or Comprehensive Plan Amendments

UTILITY INFRASTRUCTURE

For counties interested in managing and maintaining utility infrastructure, our solution include:

- **Solid Waste Disposal Manager**
Finding optimum sites for waste disposal
- **Public Healthcare Manager**
For planning, distribution and regulation of essential Healthcare services
- **Recreation Manager**
Making County an attractive place in to live, work and play
Protect vistas and view sheds
Assist municipalities with recreation acquisitions and development projects
- **Public Safety Services**
For providing fast and easy ways to locate information on Emergency services and an effective tool to find route.
